CITY OF ATLANTA

MUNICIPAL CLERK

SHIRLEY FRANKLIN
MAYOR

55 TRINITY AVENUE, S.W.
ATLANTA, GEORGIA 30335-0300
TEL (404) 330-6100

March 4, 2003

03-C-0418

The Honorable Cathy Woolard, President
Members of the Atlanta City Council
55 Trinity Avenue, S.W.
Atlanta, Georgia 30335

Dear President Woolard and Members of Council:

It is my pleasure to appoint Mr. Able A. Kani as Chief Information Officer for the city of Atlanta. Mr. Kani is the current Chief Information Officer for Memphis, Tennessee. As the CIO of Memphis, he has direct oversight, planning and implementation of an e-government model for the City. Mr. Kani's has the experience and expertise to help the City of Atlanta move forward with strategic planning, develop long-range planning for the City's e-government operations. His career accomplishments include more than 15 years of extensive information systems experience in both the public and private sectors. Mr. Kani led the City of Memphis into the 21st century by developing an e-business model that is helping to transform Memphis into a premier digital government.

Mr. Kani has worked for the past 13 years for the city of Memphis. Previous to this, he was Information Technology Manager for Baptist Memorial Hospital in Memphis for 2 years and has worked for International Paper Company, Metropolitan Life Insurance and Liberty Bank and Trust Company in information services and technology.

Mr. Kani's experience and training make him an exceptionally, well-qualified candidate for the position of Chief Information Officer. Therefore, it is with great pleasure I submit his name to you and urge confirmation of his appointment.

Sincerely,

Shirley Franklin

COUNCIL

MAJOR ACCOMPLISHMENTS

ABE A KANI

Under my leadership, Mayor Herenton's vision for privatizing the day-to-day operation of information technology was accomplished. I successfully negotiated and closed an outsourcing contract estimated at over \$50 million. I convinced the administration to continue to maintain control over the strategic planning and direction for IT, City ownership of IT assets, and business process re-engineering efforts. I developed and implemented a CIO Office organization structure that has ensured an effectively managed transition. The emphasis remains on alignment of IT strategic objectives with business and organizational objectives. I expanded the role of the CIO's office to include support of the Police Division's IT services. I founded an Information Technology Governance Board made up of members from the private sector including Fed Ex, University of Memphis and International Paper. Although the Board oversees IT policy formulation and project approval, the IT governance process encourages participation by City Divisions in the identification, selection and prioritization of IT projects that are based on sound business justification.

I successfully communicated a vision for the City to utilize emerging technologies; especially Internet based technologies, to transform the City into a premier digital government. I led the effort to install the City's first e-portal and intranet, which are touted as one of the premier city government web sites in the country. Many business process re-engineering efforts resulted in most government services being made available on line and accessible through multiple channels including PC, telephone and other wireless devices.

As opposed to reactionary measures, I made planning the basis for determining where the City must invest in technology and how IT initiatives will be evaluated and prioritized. For the first time in many years, the City now has multiple strategic plans including the Comprehensive Technology Master Plan, E-government Strategic Plan, and Enterprise Telecommunication Plan. These plans are kept up to date and are the basis for developing tactical planning and for preparing annual IT budget.

ABE A KANI

SUMMARY

An information technology executive with progressively responsible experience in delivering enterprise solutions that bring success to the business. Recognizing the increasing value of technology as a strategic asset, has demonstrated the ability to promote the use of technology throughout the organization. Regarded as a leader capable of implementing change seamlessly to empower the organization to remain competitive. Known as an effective communicator working well with people at all levels. An effective planner who exceeds the expectations of his clients.
